14 April 2009

NOSRAM Pearl Evolution

The first ever brushless World Champion speed control!
With the release of the Pearl Evolution, NOSRAM again proves it is the leading manufacturer in brushless technology. This completely new speed control with new soft-and hardware is developed for ultimate racing performance and unbeatable on-track performance!

Features:

Full contact cooling – revolutionary full contact cooling for lowest running temperature.

New XPS.3 software – 10 power profiles for finest adjustments to all classes and motors. Including team profiles.

All new brake design – stronger push-brake and 10 autobrake settings for perfect adjustment

Extra small 30.5x34.0x16.0mm

Smart-Temp-Read-Out-System 2

Sensored technology

LiPo + 4, 5 and 6 cell optimized

Smart-cell system

Forward/brake

2.6mm² power wire

3-way protection-system

B.E.C. 6.0V/3.0A

Brushless: over 4.0 turns

Complying with the following federations:
